Open Source Icons
About

We need to get rid of some closed source and ugly icons and choose/create some consistent iconset for Admin panels and other icons.

For example, this icon:

(http://themes.tikiwiki.org/https://themes.tiki.org/show_image.php?id=55 [↗](#))

It seems to be an icon taken from WindowsXP and converted to gif which brings licensing issue.

Main Story

Preferred format should be indexed (max. 256 colors) or alpha transparent PNGs with background colour set to white (when alpha it renders with white background in MSIE, instead some ugly grey or black background). Also when PNG is in indexed palette of same colour amount it gives better compression results than traditional GIF.

Freely Available Iconsets (must be LGPL or compatible to be shipped with Tiki)

Crystal Clear by Everaldo

<http://www.kde-look.org/content/show.php?content=25668> [↗](#)

License: LGPL

License: Creative Commons Attribution Share-Alike license

Mark James - Silk Icons

<http://www.famfamfam.com/> 

License: [Creative Commons Attribution 2.5 License](#) 

Monochrome Icons

<http://www.kde-look.org/content/show.php?content=18317> 

License: LGPL

Pros: very accessible, could be used together with gferreira icons

Cons: someone may find them ugly

Note: Coloured version is called "Primary" and can be found here:

<http://www.kde-look.org/content/show.php?content=39469> 

Glaze Icons

<http://www.kde-look.org/content/show.php?content=23966> 

License: LGPL

Jini Iconset

mose found some LGPLed iconset on art.gnome.org too, which is called Jini (?)

game-icons.net

<http://game-icons.net/> 

Font Awesome

The iconic font designed for use with Twitter Bootstrap

<http://fontawesome.github.com/Font-Awesome/> 

Iconic

[Iconic is an open source icon set consisting of 171 marks in raster, vector and font formats.](#)
