

Andreas08 theme for 1.10 beta

 Gary Cunningham-Lee - Sun 18 of May, 2008 04:16 GMT-0000 - (10231 Reads)

The Andreas08 theme is available for TikiWiki 1.10. See a demo at zukakakina.com/Andreas08 . The files can be downloaded from gallery 17. This is a port of the classic design by Andreas Viklund .

The theme files have also been added to mods.tikiwiki.org so the theme can be installed using the Admin Mods feature if that is available at the site (shell access needed).

Andreas08 fully supports Look & Feel (Site Identity) options, etc., and all the other new features in Tiki 1.10.
